

Gain more control & efficiency of your **ENTIRE** digital process.

Manage and track all jobs, assets, activity and more throughout your entire process from this Cloud-based management hub.

Set up customer jobs ahead of time for your templators, including job/order details and customer agreements, to speed you up in the field and enhance scheduling. Easily confirm job details and capture sign-offs from customers at the jobsite.

LT3Raptor has taken the user-friendly foundation of the current LT software and enhanced it along with built-in Templating Intelligence to make digital templating even quicker and easier to get more jobs done per week.

Obtaining written and visual documentation and approvals onsite is critical to your business and customers. LT3Raptor allows you to collect and organize all your information in one comprehensive package.

Some of the new features in LT3Raptor, including scribelines/scribetabs/offsets and intelligent nesting for efficient slab layout and fabrication, allow you to speed up your file prep and programming processes to help optimize your workflow and increase production.

Output a list of all countertops, backsplashes, and other pieces along with their dimensions into one easy-to-read PDF helping you to keep track of all pieces within a job. Integrate the LPI StoneTag label system to apply physical labels on each piece to enhance your QC and install processes.
